Node.js MySQL

Node.js mysql module is used to execute mysql database query like select, delete, update, insert etc.

Install MySQL Module

You can install mysql module using below command.

```
D:\nodejs\website> npm install mysql
```

Node.js can use this module to manipulate the MySQL database.

You can use mysql module in your application as below require function.

```
const mysql = require('mysql');
```

Example :

```
var mysql = require('mysql');
```

```
var conn = mysql.createConnection({  
  host: "localhost",  
  user: "root",  
  password: "*****"  
});
```

```
conn.connect(function(err) {  
  if (err) throw err;  
  console.log("Mysql server has been connected!");  
});
```

//Output : Mysql server has been connected!
