Node.js MySQL Create Table

MySQL package is used to create table in mysql using node js.

CREATE TABLE table_name mysql statement is used to create new table in mysql database.

Example :

```
const mysql = require('mysql');

const db = mysql.createConnection({

    host: "localhost",
    user: "root",
    password: "*******",
    database : "probdb"

  });

// connect to database

db.connect((err) => {

   if (err) {

      throw err;

   }else{

    console.log('Connected to database!');

    db.query("CREATE TABLE employee(emp_name VARCHAR(255), emp_address
VARCHAR(255))", function (err, result) {
        if (err) throw err;
           console.log("New table created!");
        });
   }
```

ARYATECHNO

});

Write above code in server.js file and run this program as below.

```
D:\nodejs\website> node server.js
```

It gives output as below.

```
Connected to database! New table created!
```
