Node.js MySQL Delete

MySQL package is used to delete data from table in mysql using node js.

DELETE mysql statement is used to delete data into table in mysql database.

Example :

const mysql = require('mysql');

```
const db = mysql.createConnection({
```

```
host: "localhost",
user: "root",
password: "******",
database : "aryadb"
```

});

```
// connect to database
```

```
db.connect((err) => {
```

if (err) {

throw err;

}else{

console.log('Connected to database!');

```
db.query("delete from employee where emp_id=1", function (err, result) {
    if (err) throw err;
        console.log("Deleted record : "+result.affectedRows);
    });
}
```

});

Write above code in server.js file and run this program as below.

It gives output as below.

Deleted record : 1
