

MySQL - Create Database

Topics : [MYSQL](#)

Written on [February 23, 2021](#)

You have the root user access to create database in mysql. The CREATE DATABASE statement is used to create a new MYSQL database.

You can create new database using below query.

MYSQL Syntax :

```
CREATE DATABASE databasename;  
SHOW DATABASES;  
USE databasename;
```

MYSQL Query :

```
CREATE DATABASE ARYATECHNO
```

Shell command script:

Also you can run below mysql command in shell

```
[root@host]# mysql -u root -p  
Enter password:*****  
mysql> CREATE DATABASE ARYATECHNO;
```

PHP SCRIPT :

You can create database using php code as per as below.

```
$connection= mysql_connect($hostname, $username, $password);  
$returnval = mysql_query("CREATE DATABASE ARYATECHNO", $connection);  
mysql_close($connection);
```

You have admin privilege before creating any database.

Other MYSQL Command for database

- You can check list of database in mysql using sql command SHOW DATABASES; statement.
- Also You can select database using sql command USE databasename; statement.
