

# CSS Text Alignment

Topics : [CSS](#)

Written on [March 18, 2021](#)

CSS Text Alignment property is used to set horizontal alignment of text. We can set different alignment for text like center, left, right, justify etc. using **text-align** property.

## Syntax:

```
text-align:justify;
```

```
text-align:left;
```

```
text-align:center;
```

```
text-align:right;
```

## Example :

```
<html>
<head>
  <title>Learn Css text background color tutorials</title>
</head>
<body>
  <table width="100%" border="1" cellspacing="4" cellpadding="4">
    <tr>
      <td style="text-align:left;">Learn Css text left alignment tutorials by aryatechno</td>
      <td style="text-align:right;">Learn Css text Right alignment tutorials by aryatechno</td>
      <td style="text-align:center;">Learn Css text Center alignment tutorials by aryatechno</td>
      <td style="text-align:justify;">Learn Css text justify alignment tutorials by aryatechno</td>
    </tr>
  </table>
</body>
</html>
```

## Output :

Learn Css text left alignment tutorials by aryatechno	Learn Css text Right alignment tutorials by aryatechno	Learn Css text Center alignment tutorials by aryatechno	Learn Css text justify alignment tutorials by aryatechno
---	--	---	--

ARYATECHNO
