

## CodeIgniter MCQs with answer part - 8

Topics : [Codeigniter](#)

Written on [March 04, 2024](#)

71. Which method is used to mark the beginning of benchmarking in CodeIgniter?

- A) `start_benchmark()`
- B) `begin_benchmark()`
- C) `set_benchmark()`
- D) `initialize_benchmark()`

**Answer: A) `start_benchmark()`**

72. How do you measure the elapsed time between two points in CodeIgniter's Benchmark class?

- A) By calling the `elapsed_time()` method
- B) By calling the `start()` and `stop()` methods
- C) By using the `measure()` function
- D) Elapsed time cannot be measured in CodeIgniter

**Answer: A) By calling the `elapsed_time()` method**

73. What is the purpose of CodeIgniter's XML-RPC library?

- A) To manage database connections
- B) To handle XML data processing
- C) To generate XML documents
- D) To handle remote procedure calls (RPC)

**Answer: D) To handle remote procedure calls (RPC)**

74. How do you load the XML-RPC library in a CodeIgniter controller?

- A) `$this->load->library('xmlrpc')`
- B) `$this->xmlrpc->load()`
- C) `$this->xmlrpc->library('xmlrpc')`
- D) `$this->library('xmlrpc')`

**Answer: A) `$this->load->library('xmlrpc')`**

75. Which method is used to initialize XML-RPC configuration in CodeIgniter?

- A) `initialize()`
- B) `setup()`
- C) `config()`
- D) `initialize_xmlrpc()`

**Answer: A) initialize()**

76. What is the purpose of CodeIgniter's FTP class?

- A) To manage database connections
- B) To handle FTP file transfers
- C) To handle form submissions
- D) To generate HTML forms

**Answer: B) To handle FTP file transfers**

77. How do you load the FTP class in a CodeIgniter controller?

- A) `$this->load->library('ftp')`
- B) `$this->ftp->load()`
- C) `$this->ftp->library('ftp')`
- D) `$this->library('ftp')`

**Answer: A) `$this->load->library('ftp')`**

78. Which method is used to initialize FTP configuration in CodeIgniter?

- A) `initialize()`
- B) `setup()`
- C) `config()`
- D) `initialize_ftp()`

**Answer: A) initialize()**

79. What is the purpose of CodeIgniter's Calendar class?

- A) To manage database connections
- B) To handle form submissions
- C) To generate HTML calendars
- D) To generate HTML forms

**Answer: C) To generate HTML calendars**

80. How do you load the Calendar class in a CodeIgniter controller?

- A) `$this->load->library('calendar')`
- B) `$this->calendar->load()`
- C) `$this->calendar->library('calendar')`
- D) `$this->library('calendar')`

**Answer: A) `$this->load->library('calendar')`**
