101. What is the purpose of the WordPress `get_permalink()` function?

- a) To retrieve the permalink of a specific post or page.
- b) To enqueue JavaScript files in the WordPress header.
- c) To create a new WordPress template file.
- d) To optimize database queries for improved performance.
- **Answer: a) To retrieve the permalink of a specific post or page.**
- Explanation: The `get_permalink()` function in WordPress is used to retrieve the permalink (URL) of a specific post or page. For example:

  ```
  $post_permalink = get_permalink( $post_id );
  ```

102. Which of the following is NOT a valid WordPress conditional tag?

- a) is_author()
- b) is_category()
- c) is_attachment()
- d) is_menu()
- **Answer: d) is_menu()**
- Explanation: The `is_menu()` conditional tag is not a valid WordPress conditional tag. WordPress does not have a built-in conditional tag for checking if the current page is a menu page.

103. What is the purpose of the WordPress `the_tags()` function?

- a) To display the tags assigned to a post.
- b) To retrieve data from the WordPress database.
- c) To enqueue JavaScript files in the WordPress header.
- d) To optimize database queries for improved performance.
- **Answer: a) To display the tags assigned to a post.**
- Explanation: The `the_tags()` function in WordPress is used to display the tags assigned to a post. For example:

  ```
  the_tags( 'Tags: ', ', ', '<br />' );
  ```

104. Which of the following is NOT a valid WordPress template tag?

- a) get_comments_number()
- b) create_new_tag()
- c) the_title()

- d) get_sidebar()
- **Answer: b) create_new_tag()**
- Explanation: The `create_new_tag()` is not a valid WordPress template tag. WordPress does not have a built-in template tag for creating new tags.

105. What is the purpose of the WordPress `wp_register_script()` function?

- a) To register and enqueue JavaScript files in WordPress.
- b) To enqueue stylesheets for specific WordPress templates.
- c) To create a new WordPress template file.
- d) To optimize database queries for improved performance.
- **Answer: a) To register and enqueue JavaScript files in WordPress.**
- Explanation: The `wp_register_script()` function is used in WordPress to register JavaScript files for later use with the `wp_enqueue_script()` function. For example:

```
 wp_register_script( 'custom-script', get_template_directory_uri() .
'/js/custom-script.js', array( 'jquery' ), '1.0', true );
```

106. Which of the following is NOT a valid WordPress loop function?

- a) the_post_thumbnail()
- b) get_the_date()
- c) get_template_part()
- d) rewind_posts()
- **Answer: c) get_template_part()**
- Explanation: The `get_template_part()` function is not a loop function in WordPress. It is used to include a template file within another template file.

107. What is the purpose of the WordPress `the_content()` function?

- a) To display the post content in a WordPress theme template.
- b) To enqueue JavaScript files in the WordPress footer.
- c) To create a new WordPress template file.
- d) To optimize database queries for improved performance.
- **Answer: a) To display the post content in a WordPress theme template.**
- Explanation: The `the_content()` function is used to display the main content of a post or page in a WordPress theme template.

108. Which of the following is NOT a valid WordPress conditional tag?

- a) is_home()
- b) is_single()
- c) is_attachment()
- d) is_gallery()
- **Answer: d) is_gallery()**
- Explanation: The `is_gallery()` conditional tag is not a valid WordPress conditional tag. WordPress does not have a built-in conditional tag specifically for checking if the current page is a gallery page.

109. What is the purpose of the WordPress `get_comment_count()` function?

- a) To retrieve the total number of comments on a post.
- b) To enqueue JavaScript files in the WordPress footer.
- c) To create a new WordPress template file.

- d) To optimize database queries for improved performance.
- **Answer: a) To retrieve the total number of comments on a post.**
- Explanation: The `get_comment_count()` function is used to retrieve the total number of comments on a post in WordPress.

110. Which of the following is NOT a valid WordPress loop function?

- a) the_post()
- b) have_posts()
- c) get_sidebar()
- d) rewind_posts()
- **Answer: c) get_sidebar()**
- Explanation: The `get_sidebar()` function is not a loop function in WordPress. It is used to include the sidebar template file within a WordPress theme template.
