11. Which HTML tag is used to define the header for a section, such as a group of navigation links or a heading within a webpage?

- A) <head>
- B) <header>
- C) <section>
- D) <title>

Answer: B) <header>

Explanation: The <header> tag is used to define introductory content or a header for a section within an HTML document.

12. What is the correct HTML tag for creating a subscript text?

- A) <sub>
- B) <sup>
- C) <subscript>
- D) <s>

Answer: A) <sub>

Explanation: The <sub> tag is used to create subscript text in HTML, typically used for footnotes or mathematical expressions.

13. Which HTML tag is used to create a horizontal line or divider between content sections?

- A) <line>
- B) <hr>
- C) <divider>
- D) <linebreak>

Answer: B) <hr>

Explanation: The <hr> tag is used to create a horizontal rule or line in HTML, often used to separate different sections of content.

14. **What is the correct HTML tag for creating a hyperlink with a tooltip or additional information when hovered over?**

- A) <a>
- B) <link>
- C) <tooltip>
- D)

Answer: D)

Explanation: Adding a "title" attribute to the <a> tag allows you to create a hyperlink with a tooltip or additional information that appears when hovered over.

15. **Which HTML tag is used to define a block of quoted text or a citation within a webpage?**

- A) <quote>
- B) <blockquote>
- C) <cite>
- D) <q>

Answer: C) <cite>

Explanation: The <cite> tag is used to define a citation or reference to a creative work within an HTML document, such as the title of a book or the name of an article.

16. **What is the correct HTML tag for making a text italicized?**

- A) <italic>
- B) <i>
- C) <italicize>
- D) <italics>

Answer: B) <i>

Explanation: The <i> tag is used to italicize text in HTML.

17. **Which HTML tag is used to define the main content of a webpage?**

- A) <content>
- B) <main>
- C) <body>
- D) <section>

Answer: B) <main>

Explanation: The <main> tag is used to define the main content of an HTML document, typically containing the central content of the webpage.

18. **What is the correct HTML tag for creating a hyperlink with a specific target location**

within the same webpage?

- A) <link>
- B)
- C)
- D)

Answer: D)

Explanation: The <a> tag with the "href" attribute set to "#target" can be used to create a hyperlink to a specific target location within the same webpage by referencing the target's ID.

19. Which HTML tag is used to define a navigation menu?

- A) <nav>
- B) <menu>
- C) <navbar>
- D) <navigation>

Answer: A) <nav>

Explanation: The <nav> tag is used to define a navigation menu in HTML, typically containing links to various sections or pages of a website.

20. What is the correct HTML tag for creating a numbered list?

- A) <list>
- B)
- C)
- D)

Answer: B)

Explanation: The tag is used to create an ordered (numbered) list in HTML.
